Silver Image Print & Signs - PVC banner - artwork template 300 x 100 cm

Scale 1:1. Red dashed = bleed 5 mm (extend backgrounds to here). Solid = cut. Grey dashed = safe zone 50 mm. Bleed 5 mm on every edge (the page allows 5-10; this template uses 5). Short black ticks on the cut line mark the usual eyelet positions: the corners and every 50 cm along each edge. Keep important detail 50 mm from the edges and any eyelets: the hem folds back on itself and the eyelets punch through it. CMYK, PDF with fonts outlined and images embedded; transparency is fine; 30 dpi at the finished size is enough (a file built at 1:10 and 300 dpi gives that). Up to 150 cm wide is one drop; wider is welded. Delete the guide lines, ticks and this note before you export. silverimagelondon.com/services/banner-printing-london - October 2026
